# Eye-Flex® conveyor belting

## Metal Modular Conveyor Belting with **Flights**

- Eye-Flex® modular conveyor belting can be offered in many variations.
- Broad variety of mesh opening size available to accommodate your product/application.
- Eye-Flex® can be built to match plastic modular configuration to allow for a simpler retrofit.
- Flights are available in many different configurations to provide the Customer with flexibility depending on the application.
- Wire Belt Company can create a custom flight option that will work best for your system.
- Eye-Flex® is available with solid stainless steel flights to facilitate carrying smaller, more fragile product through the process.
- Eye-Flex® is available with mesh flights, horizontal bar flights, and vertical bar flights to provide drainage and flow through if required.
